

TEAM UPDATE · AUGUST 2026

Two New Teammates

Lakshitha and Maheswara join across software and design — taking Aura Clarus to Android and to Windows.

PREPARED FOR	AREA	STATUS
Product & Stakeholders	Team & cross-platform	Confidential

New to the Team

We have brought on two new teammates across software and design. Both are already building — extending Aura Clarus beyond Apple's platforms and strengthening how the product is designed and engineered.

Two people, two sides of the product. Design and software — working together to widen Aura Clarus's reach.

THE TEAM

Meet the two new teammates

Both joined in July 2026 and are actively contributing. Between them they cover design and product on one side, and software and machine learning on the other.

Lakshitha S

Design & Product

JOINED

July 2026

FOCUS

Design, product & the Android app

WORK MODE

Remote & in-person

Figma

Design thinking

Excel (AI-assisted)

TORA

Maheswara H

Software & Machine Learning

JOINED

July 2026

FOCUS

Backend, ML & the Windows app

WORK MODE

Online / remote

Python

Django

PyTorch

Docker

WHY IT MATTERS

These additions let us push on two fronts at once — a stronger design and product practice, and the engineering needed to bring Aura Clarus to more devices — without slowing the core roadmap.

PROFILE

Lakshitha S — Design & Product

An Industrial Engineering student bringing a design-led, productivity-focused lens to the product — and helping bring the experience to Android.

TECHNICAL SKILLS

- Figma
- Excel (AI-assisted)
- TORA — operations research

STRENGTHS

- Public speaking
- Content creation
- Networking
- Design thinking

On the team	Design, product and the Android version of the app
Work mode	Remote & in-person
Open to travel	Events, other districts, other states, other countries

In her words

"Industrial Engineering student with a strong interest in startups and design. Learning how industries work and enhancing productivity is my motive."

PROFILE

Maheswara H — Software & ML

A software and machine-learning engineer working across backend, models and deployment — and leading the Windows version of the desktop app.

LANGUAGES

- Python (ML/AI, backend)
- JavaScript
- SQL

FRAMEWORKS & TOOLS

- Django
- PyTorch
- XGBoost
- LangChain
- MLflow
- Evidently AI
- ChromaDB / FAISS

DEVOPS & DEPLOYMENT

- Docker
- Nginx
- Gunicorn
- DigitalOcean
- Linux

Working areas	ML models (LSTM / transformer, XGBoost), cloud deployment, RAG
On the team	Backend, machine learning and the Windows version of the app
Languages	Tamil, English

"I have some knowledge on the software side, and where hardware is needed I'll be happy to learn along the way."

What They're Building

The two additions are aimed squarely at reach: bringing Aura Clarus to the two platforms it does not yet cover — Android, and Windows — so more people can use it, whatever device they own.

From Apple-only to everywhere. The same Aura Clarus experience, extended to Android and Windows.

Two platforms, in progress

Aura Clarus began on Apple's platforms — an iOS app and a macOS app. The next step is parity elsewhere, and that work is already underway.

Android

The Android version of the iOS app

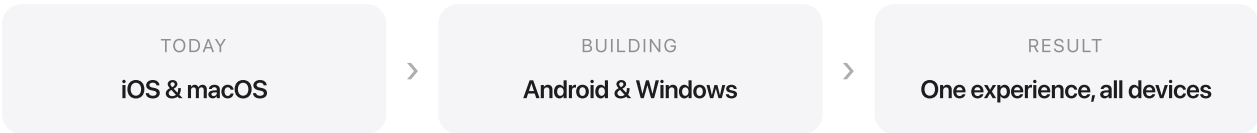

FROM	iOS app
LEAD	Design & product — Lakshitha
STATUS	In active development

Windows

The Windows version of the Mac app

FROM	macOS app
LEAD	Software & ML — Maheswara
STATUS	In active development

The goal

NOTE

The aim is a consistent Aura Clarus experience across platforms, not four separate products — the same design language and the same health intelligence, wherever it runs.

IBT AURA PRIVATE LIMITED

A bigger team, a wider reach.

Aura Clarus — wearable health intelligence. Proactive, preventive,
and designed for real lives.
