

Clarus

A Wearable Built for Professionals

[Pitch Deck >](#)

No hybrid wearable built for professionals.

Full of data with no meaning to understand.

Existing devices are sporty, inaccurate, and distracting.

Accurate. Invisible. Elegant.

92–93% wellness accuracy, 6-day always-on battery,
and a titanium design that stays formal yet invisible.

Your health plans your day.

A desktop and mobile app that schedules your entire day around how your body actually feels. It tells you when you will be most focused, when you are ready for meetings, when your energy will dip, and when to stop and rest. Your calendar, your tasks, and your priorities all sync with real-time health data from your wrist. Even when you travel, it adjusts for jet lag and new time zones. No guessing. Your body decides your schedule.

Apple Watch

Built for everyone. Bright screen, short battery, fitness first.

Why US first?

The US market is where premium products thrive. Higher incomes, bigger market, and a launch that builds global credibility.

[Learn more in Website >](#)

How?

Starting invite-only with founders, executives, and clinicians through podcasts, panels, and expos, then expanding into enterprise wellness.

Key Metrics

Strong unit economics
from day one.

Gross Margin	67%
LTV per customer	\$800
CAC to LTV	1:43
Customer Lifetime	3 years
Monthly growth	10%

Built from purpose.

**Our body works for us every second.
We only notice it when it stops. To
genuinely care for people's health.
Not as a business. As a purpose.**

Vishwanath Kannan — Founder & CEO
